| Targeting the Ultra-Poor: Lessons from Fonkoze's Graduation Program in Haiti                           | Martin Greeley  | Brief               | Graduation<br>Approach       | Fonkoze, a Haitian non-governmental organisation (NGO), has graduated over 6,000 Haitian women out of ultra-poverty through its Chemen Lavi Miyò (CLM) programme. This Learning Brief reports key findings from a study that compared the poverty status of participants in Fonkoze's CLM programme with households identified by the national poverty indicator. | 2019                   | https://www.id<br>s.ac.uk/wp-<br>content/upload<br>s/2019/01/Targ<br>eting-the-Ultra-<br>Poor-Lessons-<br>from-Fonkozes-<br>Graduation-<br>Programme-in-<br>Haiti-1.pdf |
| Productive Safety Nets for Women in Extreme Poverty: Lessons from Pilot Projects in India and Pakistan | Naila Kabeer,<br>Karishma Huda,<br>Sandeep Kaur, and<br>Nicolina Lamhauge | Discussion<br>paper | Graduation<br>Approach       | This paper focuses upon two Graduation Program implementations – one by Trickle Up in West Bengal, India, and the other by Orangi Charitable Trust (OCT) in Sindh, Pakistan. The authors use the 'critical moments' framework developed in Kabeer (2008) to understand the conceptualisation of this project in response to a particular set of constraints       | 2012                   | https://www.so<br>as.ac.uk/cdpr/p<br>ublications/pap<br>ers/file76193.p<br>df   |

|  |  |                     |                              | (and opportunities), its translation into a concrete set of proposals for action, the implementation of these proposals, the monitoring and evaluation of the process of implementation, and finally, the utilisation of the lessons thus learnt.   |                        |   |
| 2018 State of the Sector: Synthesis Report | Inés Arévalo,<br>Michelle Kaffenberger,<br>Aude de Montesquiou | Technical<br>report | Graduation -<br>Evaluation   | Based on a survey of graduation implementations conducted by Partnership for Economic Inclusion (PEI) from July to September of 2017, this report demonstrates an analysis around graduation actors, graduation as a driver of change, as well as program design and implementation. The 2017 landscaping results show that the momentum around graduation is strong and growing, with government leaders and others testing, implementing, and scaling graduation-inspired economic inclusion programs that reach and serve the poorest. | 2018                   | https://www.fi ndevgateway.o rg/sites/default /files/publicatio n files/peis 20 18 state of th e sector repor t final.pdf |

| Leaving it behind: How to Rescue People from Deep Poverty—and Why the Best Methods Work | The Economist                                    | Newspaper<br>article | Graduation<br>Approach       | BRAC came up with a scheme to help the ultrapoor. The aim is to help women "graduate" from extreme poverty to the normal kind—as Sir Fazle puts it, "to help them back into the mainstream of poor people". Then, perhaps, they can start borrowing. Later research showed that microfinance was not the cure-all that had been thought. But BRAC's graduation program proved highly effective. | 2015                   | https://www.ec<br>onomist.com/in<br>ternational/201<br>5/12/12/leavin<br>g-it-<br>behind?utm_so<br>urce=12%2F14<br>%2F15+newsfla<br>sh&utm_campa<br>ign=newsflash<br>12_8_15&utm<br>medium=email |

| Assets, 'Assetness' and Graduation | Sung Kyu Kim and James Sumberg                   | Article  | Graduation                   | Asset-based approaches – usually involving asset transfers and/or asset building – are increasingly central to thinking about poverty alleviation, social protection, graduation and livelihood resilience.  Although the notion of assets is well established in the literature, the meanings of and relationships between asset(s), livelihood capital(s), risks(s), welfare and wellbeing, and graduation need further analysis. The authors argue that asset-ness provides a key to understanding differences in the impacts of asset-based social protection and associated processes and dynamics of graduation. As such the article aims to advance understanding of graduation theory. | 2015                   | https://opendo<br>cs.ids.ac.uk/op<br>endocs/bitstrea<br>m/handle/1234<br>56789/7276/ID<br>SB 46 2 10.11<br>11-1759-<br>5436.12135.pdf<br>?sequence=1 |

| Sustaining Graduation: A Review of the CLM Program in Haiti | Chris Pain, Emilie Vautravers and Alain Descieux | Article  | Graduation<br>Approach       | The Haitian NGO Fonkoze, with the support of Concern Worldwide, has been implementing the Chemin Lavi Miyo (CLM) Graduation program since June 2007 which targets the extreme poor in Haiti. Early results were promising, but questions prevailed around the sustainability of benefits. To address these concerns a further round of data collection was undertaken amongst a group of participants four years after graduation. This article concludes that the considerable proportion of households who have slipped back after 'graduation' is a cause for concern and at a program level suggests the need for more concerted follow-up with beneficiaries in the post-graduation phase. | 2015                   | https://opendo<br>cs.ids.ac.uk/op<br>endocs/bitstrea<br>m/handle/1234<br>56789/7286/ID<br>SB 46 2 10.11<br>11-1759-<br>5436.12130.pdf<br>?sequence=1 |

| The Chars Livelihoods Program in Bangladesh: Factors that Enable, Constrain and Sustain Graduation | Matthew Pritchard, Stuart<br>Kenward, Maksudul<br>Hannan | Article  | Graduation<br>Approach       | As with other poverty reduction programs in Bangladesh, Chars Livelihoods program's (CLP's) success is partly judged using the concept of graduation. Defining graduation and how to actually measure it has generated significant debate. This article, prepared by members of the team responsible for implementing the program, explains how CLP's thinking in terms of defining and measuring graduation has evolved over time. The authors conclude that the sustainability of graduation should not be overlooked. It is also worth thinking about whether indicators of graduation remain valid and important as time from graduation lengthens. | 2015                   | http://bulletin.i<br>ds.ac.uk/idsbo/<br>article/view/10<br>8 |

| Exit or Developmental Impact? The Role of 'Graduation' in Social Protection Programs | Michael Samson                                   | Article  | Graduation<br>Approach       | Appropriately designed and effectively implemented, a 'graduation' approach can sustainably promote dynamic outcomes, with inclusive economic expansion reinforcing poverty reduction, which in turn contributes to further growth and development. These micro-oriented initiatives will likely work best when embedded within a broader macro development framework that integrates and strengthens the range of social and economic policy instruments implemented by government. This article maps out a path for policymakers aiming to strengthen the pro-poor and inclusive economic growth and development impacts of social protection by incorporating a graduation approach. | 2015                   | https://opendo<br>cs.ids.ac.uk/op<br>endocs/bitstrea<br>m/handle/1234<br>56789/7280/ID<br>SB 46 2 10.11<br>11-1759-<br>5436.12125.pdf<br>?sequence=1 |

| Graduating from Social Protection? Editorial Introduction | Stephen Devereux, Rachel Sabates-Wheeler  | Article  | Graduation<br>Approach       | This Editorial Introduction reviews alternative conceptualisations of graduation, summarises the evidence on impacts from several project evaluations presented in the IDS Bulletin, and discusses key aspects of design and implementation and the nature of political support for graduation. The editors conclude that graduation programs are an important and valuable contribution to development policy, but they should not displace the core social protection functions of social assistance and social insurance. | 2015                   | https://opendo<br>cs.ids.ac.uk/op<br>endocs/bitstrea<br>m/handle/1234<br>56789/7273/ID<br>SB 46 2 10.11<br>11-1759-<br>5436.12124.pdf<br>?sequence=1 |

| Final Evaluation of the Unleashing the Productive Capacity of the Extreme Poor Graduation Program | Rosaleen Martin and Jenny Swatton                | Technical<br>report | Graduation -<br>Evaluation   | This is the final evaluation of the Unleashing the Productive Capacity of the Extreme Poor Graduation Program implemented in Rwanda. The graduation program targeting the extreme poor with labour capacity forms a major part of the current country program and is likely to continue to do so in the medium-term. This evaluation is, therefore, a timely and useful reflection for informing future programming in Rwanda as well as Concern's organisational learning for other country programs interested in adapting the graduation model to their contexts. | 2016                   | https://www.c<br>oncern.net/insi<br>ghts/final-<br>evaluation-<br>unleashing-<br>productive-<br>capacity-<br>extreme-poor-<br>graduation-<br>program |

| Unleashing the capacities of vulnerable households: Concern Worldwide's Graduation Program in Rwanda | Stephen Devereux                                 | Brief    | Graduation<br>Approach       | Concern launched a program called 'Enhancing the Productive Capacity of Extremely Poor People', also known as the 'Graduation program', in two districts of southern Rwanda – Huye and Nyaruguru – in May 2011. The program supports extremely poor households with a sequenced package that includes: cash transfers to meet basic needs, skills development and asset transfers to improve livelihood options, and savings facilities to buffer risk and fund investments in productive activities, with the goal of facilitating sustainable exits from extreme poverty. This brief captures the key lessons learned from the first 12 months of the Graduation program in Rwanda. | 2014                   | https://www.c oncern.net/site s/default/files/r esource/2014/ 08/concern_wo rldwides_gradu ation_program _in_rwanda_0. pdf |

| The Impact of Variations of Ultra-Poor Graduation Programming in Uganda | Richard Sedlmayr,<br>Munshi Sulaiman, and<br>Anuj Shah | Brief    | Graduation                   | Innovations for Poverty Action conducted a randomized evaluation to test the impacts of diverse components and variants of the Village Enterprise microenterprise program, an integrated poverty alleviation intervention that provides poor households with a combination of cash transfers, mentorship, business training, and support with the formation of savings groups, over a one-year period. Preliminary results suggest that the program can increase sustained asset holdings and consumption, as well as subjective well- being and nutrition. These findings are consistent with previous research on ultra- poor graduation programs and thus lead to greater overall confidence in the graduation model in reducing poverty. | 2018                   | https://www.p<br>overty-<br>action.org/sites<br>/default/files/p<br>ublications/VE<br>%20Results%20<br>Brief.pdf |

| Graduation Model Event: Overview of Discussions | Institute of Development<br>Studies (IDS) and<br>Concern Worldwide | Brief    | Graduation<br>Approach       | Results from studies on graduation programs in Burgundi and Rwanda conducted by the Institute of Development Studies (IDS) and Concern were launched on 25 October 2016. Three presentations from Alice Simington, former Country Director for Concern in Rwanda and Burundi, and Keetie Roelen and Stephen Devereux from the Centre of Social Protection - IDS focused on the experiences implementing the program and some of the key results from the research in the two countries. This document presents a brief overview of research findings and a summary of the lively discussions these prompted during the Graduation Model Event. | 2016                   | https://www.m<br>icrofinancegate<br>way.org/library<br>/graduation-<br>model-event-<br>overview-<br>discussions |

| Ultra Poor<br>Graduation<br>Pilots: Spanning<br>the Gap between<br>Charity and<br>Microfinance | Nathanael Goldberg<br>Arielle Salomon            | Workshop<br>paper | Graduation<br>Approach       | This paper discusses the origin and impact of the Ultra Poor Graduation Program that BRAC launched in 2002 when it noticed that ultra-poor households were not benefiting from its microfinance program. In 2006, CGAP and the Ford Foundation joined together to replicate the intervention in other countries along with a series of impact evaluations. One of the conclusions is that the graduation model has the potential to pick up where microfinance has left off in helping households who are most in need. | 2011                   | http://www.mi<br>crocreditsummi<br>t.org/uploads/r<br>esource/docum<br>ent/goldbergn<br>salomona_ultra<br>_poor_graduati<br>on_82362.pdf |

| Eliminating Extreme Poverty: Comparing the Cost- Effectiveness of Livelihood, Cash Transfer, and Graduation Approaches | Munshi Sulaiman, Nathanael Goldberg, Dean Karlan | Study report | Graduation/<br>Livelihood    | This paper compares the cost-effectiveness of three strands of anti-poverty social protection interventions by reviewing 30 livelihood development programs, 11 lump-sum unconditional cash transfers, and seven graduation programs. Impacts on annual household consumption (or on income when consumption data were not available) per dollar spent were used to benchmark cost-effectiveness across programs. Among all 48 programs reviewed, lump-sum cash transfers were found to have the highest benefit-cost ratio, though there are very few lump-sum cash transfer programs that serve the extreme poor or measure long-term impacts. Graduation programs are more cost-effective than the livelihood programs that targeted the extreme poor and measured long-term impacts. | 2016                   | https://www.p overty- action.org/sites /default/files/p ublications/For um-Eliminating- Extreme- Poverty-Dec- 2016.pdf |

| Graduating the Ultra Poor in Peru (Study Summary) | Innovation for Poverty Action (Research team: Dean Karlan, Bram Thuysbaert, Catherine Timura) | Study report | Graduation                   | While many credit and training programs have not been successful at raising income levels for these ultra-poor households, recent support for livelihoods programs has spurred interest in evaluating whether comprehensive "big push" interventions may allow for a sustainable transition to self-employment and a higher standard of living. To test this theory, in six countries researchers evaluated a multi-faceted approach aimed at improving long term income of the ultra poor. They found that the approach had longlasting economic and self-employment impacts and that the long-run benefits, measured in terms of household expenditures, outweighed their up-front costs. Here is the summary of the study in Peru. | 2014                   | https://www.p<br>overty-<br>action.org/print<br>pdf/6386 |

| A Gradual Approach to Local Integration | UNHCR (United Nations<br>High Commissioner for<br>Refugees) | Technical<br>report | Graduation<br>Approach       | The so called Graduation Model is a comprehensive program of support for refugees who are economically active or have the potential to generate income, and find themselves in a situation of vulnerability. In March 2016, UNHCR Ecuador has started to implement the Graduation Model at the national level, which intends to reach 1500 families (an approximate of 7500 individuals). The purpose of this program is to overcome risk of exclusion poverty under which these families live, with the ultimate goal of reaching integration in their new community, thus creating a long term sustainable solution. | 2016                   | http://sp-fragility-displacement.onetec.eu/docs/UNHCR_A%20gradual%20approach%20to%20local%20integration,%20Ecuador.pdf |

| From Extreme Poverty to Sustainable Livelihoods: A Technical Guide to the Graduation Approach | Aude de Montesquiou<br>Tony Sheldon<br>Frank F. DeGiovanni<br>Syed M. Hashemi | Technical guide/Toolkit | Livelihoods<br>Program       | This Technical Guide provides a "how-to" roadmap for practitioners wishing to implement programs based on the Graduation Approach. The Guide draws on the lessons learned over the eight-year (2006-2014) course of a global pilot program involving 10 programs in eight countries. The authors conclude this Technical Guide with one of the observations with which they began it: poverty is a complex, multi-dimensional phenomenon. Such complexity means that caution is warranted when attributing causation to any given intervention, including the Graduation Approach. | 2014                   | http://www.cg ap.org/sites/de fault/files/grad uation guide fi nal.pdf |

| Crafting a Graduation Pathway for the Ultra Poor: Lessons and Evidence from a BRAC program | Imran Matin, Munshi<br>Sulaiman, Mehnaz<br>Rabbani | Working paper | Livelihoods<br>Program       | In this paper, an innovative approach that BRAC has been experimenting with since 2002 to craft a graduation pathway for the ultra poor is described. Based on experiences of implementing this approach and evaluation research, a number of key lessons for the broader thinking on tackling ultra poverty are drawn. The most important finding was that the ultra poor are not a homogeneous group. Differences in financial market participation as well as the comparatively slow progress of the nonselected ultra poor households have led to designing different packages for different groups of ultra poor. | 2008                   | http://research .brac.net/new/ component/k2/ crafting-a- graduation- pathway-for- the-ultra-poor- lessons-and- evidence-from- a-brac-program |

| Bandhan's Targeting the Hard Core Poor Program: A qualitative study on participants' ascent out of extreme poverty | Anasuya Sengupta                                 | Study report | Livelihoods<br>Program       | In 2009, Bandhan targeted 300 women in one of the poorest districts of West Bengal, India to implement the 'Targeting the Hard Core Poor' (THP) pilot. In this study, factors that have kept THP participants steady on the pathway out of poverty 3 years after the pilot has ended and the challenges they continue to face were identified. The study shows that although poor households exist in a social and political environment that strongly influence their life trajectories, Bandhan's experience proves that the Graduation approach can enable the poorest to embark on a path towards economic freedom. | 2013                   | https://www.m icrofinancegate way.org/sites/d efault/files/pub lication_files/b andhan-thp- a qualitative study on parti cipants ascent out of extre me poverty .p df |

| An End in Sight for Ultra-Poverty Scaling up BRAC's Graduation Model for the Poorest | BRAC   | Brief    | Livelihoods<br>Program       | After decades of trial and error, starting in 2002 BRAC began deploying a set of carefully sequenced measures tailored to the unique set of challenges faced by the ultra-poor. The results have been astonishing. Using intensive training and support deployed over 24 months, the ultra-poor can "graduate" from ultra-poverty. This brief provides a summary of the global issue of ultra poverty and BRAC's pioneering approach to poverty alleviation. | 2013                   | www.brac.net/<br>sites/default/fil<br>es/BRAC%20Bri<br>efing%20-<br>%20TUP.pdf |

| The Impact of Ethiopia's Productive Safety Net Program and Its Linkages | Daniel O. Gilligan John Hoddinott Alemayehu Seyoum Taffesse | Discussion paper | Livelihoods<br>Program       | This paper assesses the impact of Ethiopia's Productive Safety Nets Program (PSNP), the largest social protection program in Sub-Saharan Africa outside of South Africa. The authors find that the program has little impact on participants on average, due in part to transfer levels that fell far below program targets. Households with access to both the PSNP and packages of agricultural support were more likely to be food secure, to borrow for productive purposes, use improved agricultural technologies, and operate their own nonfarm business activities. The findings show that beneficiaries did not experience faster asset growth as a result of the programs. | 2008                   | http://citeseerx .ist.psu.edu/vie wdoc/downloa d?doi=10.1.1.1 44.1491&rep=r ep1&type=pdf |

| A Methodology to Assess Indicative Costs of Risk Financing Strategies for Scaling Up Ethiopia's Productive Safety Net Program | Daniel Clarke Sarah Coll-Black Naomi Cooney Anna Edwards | Working paper | Livelihoods<br>Program       | This paper proposes and illustrates a methodology to assess the economic cost of the sovereign risk finance instruments available to the Government of Ethiopia and its development partners for financing the shock-responsive scalability component of the Productive Safety Net Program. The methodology involves: (i) specifying rules for when additional expenditures would be triggered in each woreda; (ii) specifying alternative risk finance strategies; and (iii) analyzing the costs of each risk financing strategy, including sensitivity and scenario testing of the results. The methodology is applied to a hypothetical set of rules for drought-responsive scalability, and a range of potential risk finance strategies. | 2016                   | https://openkn<br>owledge.world<br>bank.org/bitstr<br>eam/handle/10<br>986/24636/A0<br>methodology00<br>safety0net0pro<br>gram.pdf?sequ<br>ence=1&isAllo<br>wed=y |

| The Impact of Ethiopia's Productive Safety Nets and Household Asset Building Program: 2006-2010 | Guush Berhane John Hoddinott Neha Kumar Alemayehu Seyoum Taffesse | Study report | Livelihoods<br>Program       | This report assesses the impact of the Productive Safety Nets Program (PSNP) of Ethiopia and other food security and asset building programs on food security, assets, and agricultural production. It also examines whether these have led to investments in new nonfarm business activities and whether they have had disincentive effects. One of the findings is that the PSNP has significantly improved food security among households receiving the HVFB (High Value Food Basket), and that receipt of Public Works transfers increases the probability that a household enters nonfarm business activity. | 2011                   | https://www.id<br>s.ac.uk/files/d<br>mfile/Impact_R<br>eport_FINAL_J<br>AN2012.pdf |

| Integrating Public Works and Cash Transfers in Ethiopia: Implications for Social Protection, Employment and Decent Work | Maikel Lieuw-Kie-Song                            | Working paper | Livelihoods<br>Program       | What is the relevance of Africa's second largest social protection program, Ethiopia's Productive Safety Net Program (PSNP), for other countries and especially for India, Brazil and South Africa (IBSA)? Are there policy lessons to be noted and operational innovations to be learned from? At least in part, this paper sets out to answer these questions by reviewing and analysing the employment and social-protection aspects of PSNP. It concludes that the integration of social transfers and public works does lead to programs wherein the distinction between social protection and employment becomes somewhat blurred, but perhaps this is an advantage, since it allows the program to select the most effective and appropriate aspects of either. | 2011                   | http://www.ipc - undp.org/pub/I PCWorkingPap er84.pdf |

| Integrating Public Works and Transfers in Ethiopia: An Innovative Approach to Social Protection, Employment and Decent Work | Maikel Lieuw-Kie-Song                            | One pager | Livelihoods<br>Program       | The author explores the relevance of the Productive Safety Net Program (PSNP) in Ethiopia for other countries implementing or considering public works or transfer (cash and/or food) programs. The integration of public works and transfers enables PSNP to address a number of gaps that each of these instruments, when used separately, are unable to cover. Many countries have acted as if they have had to choose between these two social protection instruments, and PSNP clearly demonstrates that this is a false choice. | 2011                   | http://www.ipc  undp.org/pub/I PCOnePager13 2.pdf |

| Exploring and Strengthening the Intersections between Social Protection, Employment and Inclusive Growth | International Policy<br>Centre for Inclusive<br>Growth (IPC - IG) | Discussion paper | Livelihoods<br>Program       | The paper looks at additional sources of vulnerability that increasingly need to be better incorporated into social protection and social policies. It highlights that while social protection programs are increasingly acknowledging the imperative to recognise gender-differentiated priorities and impacts, continuing inequities faced by poor women in both paid and unpaid care work remain as a source of concern. New program approaches from the South and the North point to how addressing these inequities can underpin an employment-friendly recovery and growth process. | 2013                   | http://www.ipc  undp.org/pub/I PCTechnicalPap er6.pdf |

| Combining Social Protection with Economic Opportunities in Rural Peru: Haku Wiñay | Javier Escobal and Carmen Ponce                  | Bulletin/New sletter | Livelihoods<br>Program       | Haku Wiñay, the project designed and piloted by the Cooperation Fund for Social Development (FONCODES), targets rural households living in extreme poverty. To maximise its efficacy, the intervention is being deployed in the same rural areas where Juntos, the Peruvian CCT program, is being implemented. It is part of a joint strategy aimed at strengthening households' ability to sustainably overcome extreme poverty. it is important to highlight that the implementing strategy based on the núcleo ejecutor has shown great effectiveness in circumventing the legal problems that rural development projects face in Peru when trying to develop a cross-sectoral strategy. | 2016                   | http://reposito rio.minedu.gob .pe/bitstream/ handle/123456 789/3634/Com biningSocialPro tectionwithEco nomicOpportun itiesinRuralPeru HakuWiay.pdf? sequence=1 |

| New Pathways for the Poorest: The Graduation Model from BRAC | Syed M. Hashemi and Wamiq Umaira                 | Study report | Livelihoods<br>Program       | The authors explores one specific model, BRAC's 'Challenging the Frontiers of Poverty Reduction – Targeting the Ultra Poor' (CFPR-TUP), that recognised the limits of BRAC's own poverty focused programs and developed a new strategy designed specifically for the poorest. They present the model as a major innovation in their understanding of extreme poverty and demonstrate its success in combating many of the conventional 'poverty traps' and 'graduating' many of the poorest out of extreme poverty. But they also show how the process of 'graduation' is fraught with challenges, how it is ultimately limited by meso level constraints and how many will always require state level support. | 2011                   | https://www.id<br>s.ac.uk/files/d<br>mfile/Research<br>Report10FINAL.<br>pdf |

| Targeting the Hard-Core Poor: An Impact Assessment | Abhijit Banerjee, Esther<br>Duflo, Raghabendra<br>Chattopadhyay and<br>Jeremy Shapiro | Study report | Livelihoods<br>Program       | This study reports the results of a randomised impact evaluation of a program designed to reach the poorest of the poor and elevate them out of extreme poverty. The results of this study, based on a pilot in India, indicate that this intervention succeeds in elevating the economic situation of the poorest. Our results are consistent with the notion that the wealth transfer, in the form of asset distribution, directly increased consumption among beneficiary households through the liquidation of assets, but other sources of income, notably from small enterprises, appear to have contributed to the overall increase in consumption as well. | 2011                   | https://www.p<br>overtyactionlab<br>.org/sites/defa<br>ult/files/publica<br>tions/110-<br>%20November<br>%202011_0.pdf |

| Social Inclusion in Productive Safety Net Programs | Emilie Combaz                                    | Technical report | Livelihoods<br>Program       | This report focuses on Productive Safety Net Programs (PSNPs) in Sub-Saharan Africa, in the agricultural sector, whose main goal is generating employment through labour-intensive works. It examines an issue that has been less studied in PSNPs: what has worked and failed to work to achieve social inclusion? A country case study is provided on Ethiopia. The case provides lessons learned in terms of interventions for specific groups (with regard to gender, HIV/AIDS, pastoralists), participation and selection (the politics of inclusion, the selection of participants, participation, graduation), and monitoring and evaluation. | 2013                   | http://gsdrc.or<br>g/docs/open/h<br>dq1005.pdf |

| Transforming Livelihoods for Resilient Futures: How to Facilitate Graduation in Social Protection Programs | Rachel Sabates-Wheeler Stephen Devereux          | Working paper | Livelihoods<br>Program       | The paper aims to map out the theory of change underpinning the notion of graduation and to set out, conceptually and empirically, the range of enabling and constraining factors that facilitate or undermine this change process. It critiques this theory of change by drawing on a variety of literature and program experience that enables the authors to lay out a range of conditions under which graduation is more or less likely to occur. The authors draw some conclusions, such as programming for graduation needs to be placed in a broader context of market and community thresholds, initial assets levels of households and community, the likelihood of agglomeration effects, and the unpredictability of the environment. | 2011                   | https://opendo<br>cs.ids.ac.uk/op<br>endocs/bitstrea<br>m/handle/1234<br>56789/2320/FA<br>C Working Pa<br>per 023.pdf?se<br>quence=1&isAll<br>owed=y |

| Welfare and Poverty Impacts of India's National Rural Employment Guarantee Scheme: Evidence from Andhra Pradesh | Klaus Deininger<br>Yanyan Liu                    | Discussion paper | Livelihoods<br>Program       | Understanding the impacts of India's National Rural Employment Guarantee Scheme (NREGS) and the pathway through which its impacts are realised has important policy implications. We use a three-round 4,000-household panel from Andhra Pradesh together with administrative data to explore short- and mediumterm poverty and welfare effects of NREGS. Triple difference estimates suggest that participants significantly increase consumption in the short run and accumulate more nonfinancial assets in the medium term. Asset creation via programinduced land improvements is consistent with a medium-term increase in assets by nonparticipants and increases in wage income in excess of program cost. | 2013                   | https://pdfs.se<br>manticscholar.<br>org/decc/8245<br>8cbb1b8cf6849<br>cd0b693b0e64<br>a00a40c.pdf |

| Right to Work? Assessing India's Employment Guarantee Scheme in Bihar | Puja Dutta Rinku Murgai Martin Ravallion Dominique van de Walle | Book     | Livelihoods<br>Program       | India's 2005 National Rural Employment Guarantee Act creates a justiciable 'right to work' by promising up to 100 days of wage employment per year to all rural households whose adult members volunteer to do unskilled manual work. This study asks: Are the conditions stipulated by the Act met in practice? How much impact on poverty do the earnings from the scheme have? Why might that impact fall short of its potential? How can the scheme bridge that gap? The bulk of the study focuses on the scheme's performance in one of India's poorest states, Bihar, where one would hope that a scheme such as this would help reduce poverty. The study finds that the scheme is falling well short of its potential impact on poverty in Bihar. | 2014                   | https://openkn<br>owledge.world<br>bank.org/handl<br>e/10986/17195 |

| Mainstreaming Graduation into Social Protection Floors | Harshani Dharmadasa,<br>Ian Orton, Lauren<br>Whitehead | One pager | Livelihoods<br>Program       | To attain the right to social protection for people living in extreme poverty and, simultaneously, SDG Goal 1, it will be necessary to lift the ultra poor above the international extreme poverty line of USD1.90/day. The authors argue that the 'Graduation' approach, which aims to equip the poorest of the poor with the tools, livelihoods and self-confidence to escape extreme poverty after the end of the intervention, is an effective approach. | 2016                   | http://www.ipc  undp.org/pub/ eng/OP324 Ma instreaming gr aduation into Social Protecti on floors.pdf |

| Reaching the Poorest: Lessons from the Graduation Model                   | Syed M. Hashemi and Aude de Montesquiou          | Focus note  | Livelihoods<br>Program       | In 2006, CGAP and the Ford Foundation launched an initiative to test and adapt BRAC's approach in a diversity of countries and contexts. The result of this initiative is the CGAP–Ford Foundation Graduation Program, a series of 10 pilot projects in eight countries involving a broad range of partners and an extensive research effort, to test the universality of BRAC's approach. This paper highlights the lessons learned from the Graduation Program. It concludes that the program takes market challenges and opportunities into account in its design of livelihood options, but does not directly tackle market conditions. | 2011                   | http://www.cg ap.org/sites/de fault/files/rese arches/docume nts/CGAP- Focus-Note- Reaching-the- Poorest- Lessons-from- the- Graduation- Model-Mar- 2011.pdf |

| The Role of Public Works in Addressing Poverty: Lessons from Recent Developments in Public Works Programming (Chapter 9 of the book What Works for Africa's Poorest) | Anna McCord                                      | Book chapter | Livelihoods<br>Program       | This book chapter explores recent innovations in Public Works programming in Sub-Saharan Africa to address the challenge of social protection provision in contexts of chronic mass under- and unemployment. Three ongoing national programs introduced in the mid-2000s are explored: the Ethiopian Productive Safety Nets program, the Rwandan Vision 2020 Umurenge program, and the South African Expanded Public Works program (PWP). The programs still face challenges in providing effective social protection for the working-age poor, but nonetheless, they offer valuable options for future programming and differ significantly from the conventional PWP approach adopted in the region. | 2017                   | https://www.d<br>evelopmentboo<br>kshelf.com/doi/<br>pdf/10.3362/97<br>81780448435 |

| Costs and Benefits of Seasonal Migration: Evidence from India | Clément Imbert and John Papp                     | Working<br>paper | Livelihoods<br>Program       | This paper provides new evidence on rural-to-urban migration decisions in developing countries. Using original survey data from rural India, it shows that employment provision on local public works significantly reduces seasonal migration.  Workers who choose to participate in the program forgo much higher earnings outside of the village.  Structural estimates imply that the utility cost of one day away may be as high as 60% of migration earnings. Up to half of this cost can be explained by higher living costs and income risk. The other half likely reflects high nonmonetary costs from living and working in the city. | 2018                   | https://warwick.ac.uk/fac/soc/economics/research/workingpapers/2018/twerp_1161imbert.pdf |

| Productive Role of Safety Nets | Harold Alderman and Ruslan Yemtsov               | Technical report | Livelihoods<br>Program       | The paper provides sound knowledge in the field of social protection, containing a framework for linking social protection with growth and productivity, an updated review of the literature, new original work filling in gaps in the available evidence, and a discussion of operational implications. The paper also demonstrates that there was a shift in the economists' view on social protection, and now they are seen as a force that can make a positive contribution towards economic growth AND reduce poverty. Significantly, it looks at pathways in which social protection programs (social insurance and social assistance programs, as well as labour programs) can support better growth outcomes. | 2012                   | http://docume nts.worldbank. org/curated/en /338111468336 856525/Produc tive-role-of- safety-nets- background- paper-for-the- World-Bank- 2012-2022- social- protection-and- labor-strategy |

| Labour Markets<br>and Poverty in<br>Village<br>Economies  | Oriana Bandiera, Robin<br>Burgess, Narayan Das,<br>Selim Gulesci, Imran<br>Rasul, Munshi Sulaimany | Study report            | Livelihoods<br>Program       | This paper examines how women's choices over labour activities in village economies correlate with poverty and whether enabling the most impoverished women to take on the actions of their wealthier counterparts can set them on a sustainable trajectory out of poverty. One of the results shows that the poor can take on the work activities of the non-poor but face barriers to doing so. Find out more in the link provided.                    | 2016                   | http://sticerd.ls<br>e.ac.uk/dps/eo<br>pp/eopp58.pdf               |
| Debating Graduation, Policy in Focus (A Publication of The International Policy Center for Inclusive Growth Volume 14, Issue No. 2) | Editor: Michael MacLennan, International Policy Centre for Inclusive Growth (IPC-IG)               | Bulletin/New<br>sletter | Livelihoods<br>Program       | Since its inception in Bangladesh in 2002, the Graduation Approach has received much attention, including in mainstream media outlets. Beyond this positive media acclaim, momentum has gathered behind graduation as an essential social policy instrument. Nevertheless, the debate on its role and effectiveness remains to be settled. This particular issue of Policy in Focus attempts to capture the diversity of views that exist in the debate. | 2017                   | http://www.ipc - undp.org/pub/ eng/PIF39_Deb ating_Graduati on.pdf |

| Sustainable Escapes from Poverty through Productive Inclusion | Chiara Mariotti, Martina<br>Ulrichs and Luke Harman | Policy guide | Livelihoods<br>Program       | What are the key features of programs that allow poor people to sustainably escape from poverty in a cost-effective and scalable way? This is the question that this policy guide has investigated. Looking at evidence from social protection programs with innovative designs that combine different interventions, it has reviewed the contribution of social protection programs in facilitating sustained escapes from poverty through the productive inclusion of poor individuals in low- and middle-income countries (LMICS). | 2016                   | https://www.gi<br>z.de/expertise/<br>downloads/giz2<br>017-en-<br>sustainable-<br>escapes-from-<br>poverty.pdf |

| Assessment of the Sustainable Livelihood Program - Employment Facilitation Process | Marife Ballesteros, Tatum Ramos, Jasmine Magtibay, Aniceto Orbeta, Gerald Daval-Santos, Ann Jillian Adona, and Kathrina Gonzales | Discussion paper | Livelihoods<br>Program       | The Sustainable Livelihood Program - Employment Facilitation Track (SLP-EF Track) is a scheme that facilitates the employment of the Pantawid Pamilyang Pilipino Program (4Ps) beneficiaries. The SLP-EF Track has much potential to bring the 4Ps beneficiaries closer to reaching the poverty threshold since getting employed would provide additional income to the beneficiaries on top of the incentives offered to them by the 4Ps. For this to be realised, however, the SLP-EF Track would have to be effective in targeting beneficiaries and in identifying employment partners for 4Ps. | 2016                   | https://dirp4.pi<br>ds.gov.ph/webs<br>itecms/CDN/PU<br>BLICATIONS/pi<br>dsdps1613.pdf |

| What Interventions Create Jobs? A Review of The Evidence | Michael Grimm, Professor of Development Economics University of Passau, Erasmus University Rotterdam, IZA Bonn and DIW Berlin | Study report | Livelihoods<br>Program       | Prepared for the 2016 Brookings Blum Roundtable, this brief paper summarises findings from 55 evaluations on employment creation programs including access to finance, enterprise development training, regulation and business development support. This review clearly shows that the available evidence remains sketchy, in particular for large parts of sub-Saharan Africa, MENA, and Asia—regions where in the coming decades the need for jobs will be the highest. | 2016                   | https://www.br<br>ookings.edu/w<br>p-<br>content/upload<br>s/2016/08/glob<br>al 20160720 b<br>lum grimm v2.<br>pdf |

| Active Labor Market Programs for Youth: A Framework to Guide Youth Employment Interventions | Wendy Cunningham, Maria Laura Sanchez- Puerta, and Alice Wuermli, World Bank | Bulletin/New sletter | Livelihoods<br>Program       | Youth are three times more likely to be unemployed than adults, even in economies with strong growth. This begs the question of what is it about youth that leads to such high rates of unemployment? And what can be done to help young people more efficiently integrate into the labour market?  The World Bank Employment Policy Primer aims to provide a comprehensive, up-to-date resource on labour market policy issues. These short notes are concise summaries of best practice on various topics. | 2010                   | http://sitereso<br>urces.worldban<br>k.org/INTLM/2<br>14578-<br>110312872095<br>1/22795057/EP<br>PNoteNo16 En<br>g.pdf |

| Public Works as a Safety Net: Design, Evidence, and Implementation | Kalanidhi Subbarao,<br>Carlo del Ninno,<br>Colin Andrews, and<br>Claudia Rodríguez-Alas | Book     | Livelihoods<br>Program       | From the Victorian Poor Laws in nineteenth-century Britain to the postwar recovery of the 1940s, public works programs have historically played an essential role as countercyclical interventions to address seasonal and short-term unemployment. In recent times, the role of public works has broadened—because globalisation and economic integration, while expanding opportunities for all, has also increased the exposure to and transmission of risk, especially to the poorest. | 2013                   | https://openkn<br>owledge.world<br>bank.org/bitstr<br>eam/handle/10<br>986/11882/978<br>0821389683.pd<br>f?sequence=2 |

| Social<br>Protection and<br>Sustainable<br>Employment    | Anna McCord and Rachel Slater  | Study report | Livelihoods<br>Program       | Most workers in low-income countries are living in poverty. The rate of reduction in the share of the working poor is slowing, and the absolute number of working poor is growing in some regions. Though many economies are seeing significant growth, much of it is 'jobless' or, more commonly, entails the creation of vulnerable and poorly remunerated work. Both underemployment and unemployment represent serious challenges in low and middle-income countries. These countries are dominated by informal employment, and many young people and women are not in the labour market. | 2014                   | http://dfat.gov.<br>au/about-<br>us/publications<br>/Documents/so<br>cial-protection-<br>and-<br>sustainable-<br>employment.p<br>df |

| How to Make Public Works Work: A Review of the Experiences | Carlo del Ninno<br>Kalanidhi Subbarao<br>Annamaria Milazzo | Discussion paper | Livelihoods<br>Program       | This World Bank's paper reviews the experience with public works programs (PWPs) in several countries over the past 20 years. The analysis shows that PWP has been used extensively in response to either a one-time large covariate shock or repeated shocks. In low-income countries, PWPs also have a poverty reduction objective. The paper suggests that well-designed and -implemented PWPs can help mitigating income shocks; the program can also be used as an effective anti-poverty instrument. | 2009                   | http://sitereso<br>urces.worldban<br>k.org/SOCIALPR<br>OTECTION/Res<br>ources/SP-<br>Discussion-<br>papers/Safety-<br>Nets-<br>DP/0905.pdf |

| Supporting Self-<br>Employment<br>and Small-scale<br>Entrepreneurshi<br>p: Potential<br>Programs to<br>Improve<br>Livelihoods for<br>Vulnerable<br>Workers | Yoonyoung Cho, David Robalino, and Samantha Watson | Working paper | Livelihoods<br>Program       | A significant proportion of 55 per cent of self-employed workers worldwide live in poor or vulnerable households. In Sub-Saharan Africa, for instance, close to 80 per cent of the self-employed are poor. While numerous countries have adopted programs that aim to promote self-employment and small-scale entrepreneurship (SSE), the design of such programs seems ill-suited to respond to the needs of those who engage in entrepreneurial activities not by choice, but by necessity. Visit the link provided to learn more about the potential public policy role of programs aimed at improving the livelihoods of subsistence entrepreneurs. | 2014                   | http://docume<br>nts.worldbank.<br>org/curated/en<br>/845321468180<br>253428/pdf/92<br>6290WP0P127<br>00olicy0note0Fi<br>nal0web.pdf |

| Social Protection through Work: Supporting the Rural Working Poor in Lower Income Countries | Rodolfo Beazley and Kirit Vaidya                 | Working paper | Livelihoods<br>Program       | Extending social protection to the rural population engaged in the informal economy in lower-income countries is a global a priority. In spite of a lack of evidence about its costs and benefits and the small scale of many programs, workfare, as opposed to welfare, is often put forward as a favoured option for providing social protection for the rural working poor. This paper studies the reasons behind the renewed interest in workfare. It outlines the key characteristics of different types of workfare and welfare schemes. It also proposes a simple conceptual framework to assess the relative costeffectiveness and efficacy of different welfare and workfare policies for labour surplus households facing a diverse set of 'states' and 'shocks'. | 2015                   | https://www.o pml.co.uk/files/ Publications/co rporate- publications/w orking- papers/wp- social- protection- through- work.pdf?nore direct=1 |

| J-PAL Youth Initiative Review Paper | J-PAL  | Technical<br>report | Skills<br>Development     | This report highlights that early investments in children for cognitive skills (e.g forming concepts, reasoning, problem-solving, mental processing speed and long and short-term memory) are viewed as particularly valuable in that cognitive skills acquired at a young age can increase the productivity of investments made at later ages. Even if non-cognitive skill (e.g., interpersonal skills, integrity, emotional maturity) acquisition does not depend on critical periods, acquiring non-cognitive skills early will positively affect the returns of future skill development. | 2013                   | https://ww<br>w.povertya<br>ctionlab.or<br>g/sites/def<br>ault/files/d<br>ocuments/<br>YouthRevi<br>ewPaper<br>March 20<br>13 0.pdf |

| Generating Employment in Poor and Fragile States: Evidence from Labor Market and Entrepreneurship Programs | Christopher Blattman,<br>Laura Ralston           | Study report            | Skills<br>Development     | In this paper, Blattman and Ralston argue that skills training and microfinance have shown little impact on poverty or stability, especially relative to program cost. There are very few examples of evaluated programs that have had positive effects, at least on men. It is even more difficult to find any that pass a cost-benefit test, for men or women.   | 2015                   | http://jobs<br>anddevelo<br>pmentconf<br>erence.org<br>/wp-<br>content/u<br>ploads/201<br>6/10/RALS<br>TON-SSRN-<br>id2622220.<br>pdf  |
| SPEC Letter: Skills Development and Labour Market Outcomes   | Fazley Elahi Mahmud & Maya Ryandita              | Bulletin/Ne<br>wsletter | Skills<br>Development     | This is the fifth issue of SPEC Letter. The focus of this issue is skills development. The field of skills development is broad. Our interest is in skill development for the poorest people and the participants of the social/cash transfer programs. Though many countries have integrated skills development with social protection programs or have undertaken complementary programs, literatures are scarce on this particular area. We picked some publications and have put together the key messages in this edition. Hope this will give a snapshot of the issues and trends in this field. | 2019                   | https://ww<br>w.socialpr<br>otection.or<br>g/system/f<br>iles/SPEC%<br>20Letter%<br>20Skills%2<br>0Develop<br>ment%20a<br>nd%20Lab<br>our%20Ma<br>rket%20Ou<br>tcomes%2<br>0_0.pdf |

| Evaluating Graduation: Insights from the Vision 2020 Umurenge Program in Rwanda | Vincent Gahamanyi and<br>Andrew Kettlewell       | Article  | Public Works              | This article examines poverty reduction arising from the Vision 2020 Umurenge Program (VUP) by comparing the status of households receiving benefits for the first time in 2014 against households which received benefits in previous years and against non-beneficiary households. Key findings are that according to the community assessment of poverty (Ubudehe), beneficiaries of both Direct Support and Public Works have improved their situation, including asset holdings, savings, the ability to withstand shocks and perceived food security, and have therefore exited the program. | 2015                   | https://open<br>docs.ids.ac.u<br>k/opendocs/<br>bitstream/h<br>andle/12345<br>6789/7284/I<br>DSB 46 2 1<br>0.1111-<br>1759-<br>5436.12128.<br>pdf?sequenc<br>e=1 |
